Dear friends,

Ref: Follow up letter on our discussions

I greet you in the name of Jesus Christ. I count it a wonderful privilege to have come to know you.

Brethren in Christ Church, runs schools and health institutions. Because of this we work closely with the ministries of Education and Healthy. At the moment, the ministry of Education encourages children to learn how to use computers. Most of our schools are in rural areas where access to computers is difficult. This deprives our pupils of some learning materials.

The biggest challenge we face as a church is the variation in economic ability of the parents to these pupils. In rural areas it is hard for a parent to buy a computer or buy learning materials for their children due to poverty. The Church does not have the capacity to help out either.

The good part is that if assisted they can embark on projects that can sustain the project. The schools can also start some projects. However, they both need startup capital.

Your assistance of them in any way possible will help both the church and society in providing quality and useful education. The whole idea is that when pupils learn in class they must put in practice what they learn. Hence the need to start some projects. This will create an environment of sustainability for the project and also knowledge and skills to the learners. We envision that the learners will be able to create self-employments not to always expecting the Government to give them jobs.

If you can be of help in any way to make this a reality we will greatly appreciated.

Yours sincerely,

Bishop Charles Nseemani

Brethren in Christ Church – Zambia Conference.
